PROJECTS

- <http://planetxcars.free.nf/>

In my front end developer projects, I created static web applications from scratch, employing HTML, CSS, JavaScript and PHP and sql for the back end.
- best-home-developers.netlify.app

In this project, I created static web applications from scratch, using some basic React and email.js api to send form details.
- <http://planetxcars.free.nf/>

I build this login page, which looks like similar to twitter and also save username and password to sql (cloud).
